Annex A: New Power^X Programme Tracks – Cybersecurity and Software & Product Development
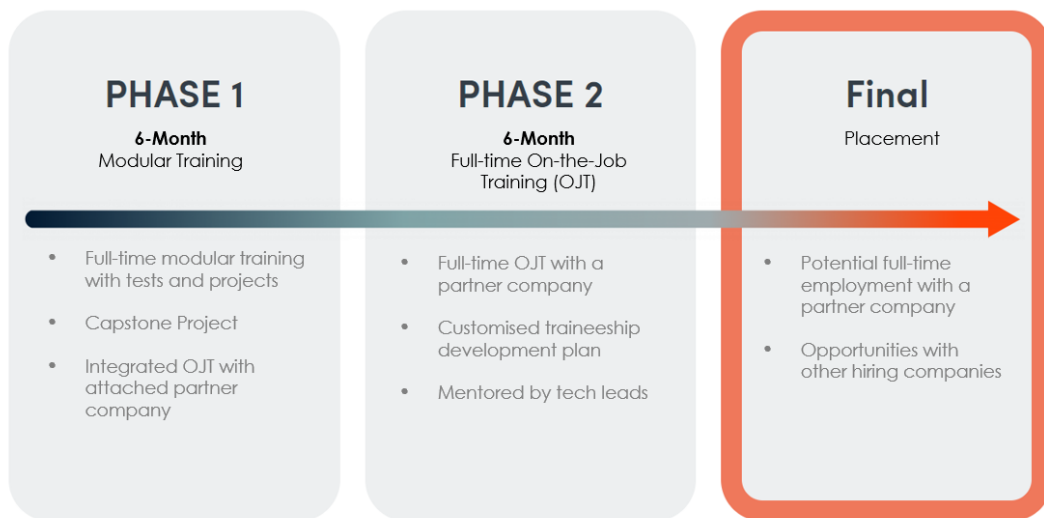

1. Power^X has expanded to include two new tracks in **Cybersecurity** and **Software & Product Development**, with the intention to groom future talent in these in-demand domains.

2. Combining both modular and on-the-job training, trainees will be guided by experienced mentors and be attached to partner companies in the respective domains.

3. Partner companies for Power^X Cybersecurity include Attila Cybertech, Cloudsine, Privasec, Silence Laboratories, while Power^X Software & Product Development trainees will get a chance to work with Ackcio, Lauretta.io, ReSync and more.

4. Power^X Cybersecurity and Power^X Software & Product Development will take place over two phases within 12 months.
   - **Phase 1:** Trainees will be taught essential technical skills (e.g. advanced programming) as well as tech translation skills via course modules. They will be attached part-time to partner companies to observe and better understand the nature of their business, as well as to embark on capstone projects, which will involve application of both technical and tech translation capabilities.
   - **Phase 2:** Trainees will undergo full-time, on-the-job training with a customised trainee development plan and guided by their mentors. Those who meet traineeship expectations may be placed in full-time roles with their attached companies or other companies within the ecosystem.

Power^X Cybersecurity and the Power^X Software & Product Development programme timeline

5. Training fees are fully funded, and trainees will receive a monthly stipend of up to SG$4,000 each during the programme.

6. Applications for all three tracks under the Power^X programme – Cybersecurity, Software & Product Development, and Robotics – will open during *New Frontier 2021*. Singaporeans and

PRs with basic programming skills and at least one year of full-time working experience in any field may apply.

7. Interested applicants can sign-up at www.sginnovate.com/power-x-programme from 10 April 2021. The deadline for application is 10 May 2021.
