

## Appendix B: Quotes from Power<sup>x</sup> trainees and Partner Companies

1. Mohammad Ashraf, inaugural Power<sup>x</sup> Robotics trainee, said, “This programme enables me to make use of the knowledge learnt through the structured training to work on actual solutions which companies are creating for the industry. I'm also a big step closer to my dream of building my own personal robot.”
2. Perlin CHU, inaugural Power<sup>x</sup> Robotics trainee, said, “Power<sup>x</sup> Robotics provided me with the opportunity to learn how to programme a robot from scratch through a good mix of structured trainings and OJT arrangements with my attached company, Movel AI. I'm currently assisting the team in developing user-friendly UI for our robotics software system, which leverages both my experience in UX design and new robotics knowledge.”
3. Matthias CHIN, Founder, Cloudsine, said, “The Power<sup>x</sup> programme has given young cybersecurity companies like us a boost to identify, recruit and train cyber talents that are critical for our growth.”
4. LING Ting Ming, CEO, OTSAW Digital Pte Ltd, said, “The pandemic has generated a greater demand for mobile automation, robotics and artificial intelligence. There is a strong need for a good pool of qualified talents to meet this increased demand. I believe the Power<sup>x</sup> programme will equip local talents with the relevant skillsets and industrial experience so they can develop better robotic solutions to benefit people and businesses.”
